

Colorado/Canyon Ute Bed® UNDER-BODY TOOLBOX

**optimizes unused
space under the deck**

**accommodates
items up to 6' long**

➤ The new underbody Ute Toolbox is designed to optimize the unused space left under the deck when mounting a Ute Bed® to the Colorado/Canyon Chassis Cab.

➤ 21" x 14" x 8" saddle bag style toolboxes on both sides are joined behind the cab by a 10" x 8" box section.

➤ This water-tight combination allows for secure storage of 6' long items, such as a carpenter's level or cement roller pins, as well as room for small tool boxes or tire chains on both sides.

➤ Water tight drop-down doors on both sides are lockable with T-handle locks. Suspension cables for doors are strong enough to stand on though not intended for use as a step.

➤ Diamond Plate polished aluminum finish.

Manufactured for Ute Ltd® by UWS, Perry, FL
